

Phoenix Aluminum-Box

Dimensions in mm

Source-Selector Box

This Phono Source-Selector Box let you build a quality switch-box with up to 4 Stereo Sources. The design turning metal knob and bursted aluminum case matches perfectly to each-other. The Shaft hole of the frontpanel has a diameter of 10,2mm and fits perfectly for Elma Type 04 switches. On the back-Side of the Frontpanel we made a mold for the Elma lock pin.

The backpanel is made for 5 Dual highend RCA connectors, stainless steel-screws complete this switch-box with no compromises. Machining is made in Germany.

Following customizings are possible:

- Custom Frontpanel
- Custom Top, Bottom processing (for example with your logo or art work)
- Custom Backpanel
- Other Dimensions, colors and Shapes on request
